North America Smart Downlights · Combined People and Product Report

Evidence visualization

Purchase-hint coverage

Verified review completeness

Selected-item coverage only. No sales or market-share estimate.
Zero observed hints does not mean zero sales or zero reviews.

Report No. 65ba48f25d9e3bbf · Created 2026-10-26 13:06 (Beijing Time)

Data frozen at 2026-10-26 13:06 (Beijing Time); collections added after the report is generated will not automatically rewrite this version.

People come from saved tasks in the original People Finder; product sales and reviews are dated public case-data snapshots. Generating the report does not re-scrape the sources.

Research Summary and Coverage

3 Amazon marketplaces, 24 product observations, 10 manually selected experience excerpts; not a complete market or review sample.

The purchase prompt is a rough estimate of the number of customers who purchased recently, not units sold or number of orders; it must not be summed to infer brand monthly sales or North America share, nor multiplied by pack quantity.

Signify · Philips Lighting: partially completed; 3 candidates this time, 1 own profile; some pages could not be read; 1 results page and 1 profile read; candidates must be verified back in the workspace before being added as customers.

Govee: reading completed, pending verification; 3 candidates this time, 2 own profiles; 1 results page and 2 profiles read; candidates must be verified back in the workspace before being added as customers.

North America Total Sales Comparison · All Selected Models and Marketplaces

Selected smart downlight ASINs and country marketplaces; not all products of the brand

The past month as stated on the page; not a calendar month or cumulative sales

Exact units sold, brand totals and sales revenue are all unavailable; missing values are not recorded as zero.

Definition source:
https://sellercentral.amazon.co.uk/help/hub/reference/external/G2CRYWPU52D7TGAK?locale=en-GB

Philips Hue · North America total units sold: unavailable

US / B0B6LP1Q1Z / 300+ bought in past month / 2026-10-26 13:02 (Beijing Time)

CA / B0B6LP1Q1Z / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

MX / B0B6LP1Q1Z / 50+ bought in past month / 2026-10-26 13:03 (Beijing time)

Philips WiZ · Total units sold in North America: unavailable

US / B0GT7N35QM / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

CA / B0GT7N35QM / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

MX / B0GT7N35QM / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

Govee · Total units sold in North America: unavailable

US / B0F2165SNY / 500+ bought in past month / 2026-10-26 13:03 (Beijing time)

US / B0B1V6G21S / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

US / B0CJJRRJ7X / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:04 (Beijing time)

CA / B0F2165SNY / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

CA / B0B1V6G21S / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

CA / B0CJJRRJ7X / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:04 (Beijing time)

MX / B0F2165SNY / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:03 (Beijing time)

MX / B0B1V6G21S / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:04 (Beijing time)

MX / B0CJJRRJ7X / Bought-in-past-month customer count prompt: unavailable / 2026-10-26 13:04 (Beijing time)

Lumary · Total units sold in North America: unavailable

US / B08LQ6V53R / Purchasing customer count indication unavailable / 2026-10-26 13:04 (Beijing time)

CA / B0F43V5X6D / Purchasing customer count indication unavailable / 2026-10-26 13:04 (Beijing time)

MX / B08LQ6V53R / Purchasing customer count indication unavailable / 2026-10-26 13:04 (Beijing time)

HALO / WiZ Pro · Total units sold in North America: unavailable

US / B0C1F1XLWS / Purchasing customer count indication unavailable / 2026-10-26 13:04 (Beijing time)

CA / B0C1F1XLWS / Purchasing customer count indication unavailable / 2026-10-26 13:05 (Beijing time)

MX / B0C1F1XLWS / Purchasing customer count indication unavailable / 2026-10-26 13:05 (Beijing time)

Cync · Total units sold in North America: unavailable

US / B0C4X96KC3 / Purchasing customer count indication unavailable / 2026-10-26 13:05 (Beijing time)

CA / B0C4X96KC3 / Purchasing customer count indication unavailable / 2026-10-26 13:05 (Beijing time)

MX / B0D94XW37S / Purchasing customer count indication unavailable / 2026-10-26 13:05 (Beijing time)

Customer focus points

Customer showcase case: prioritize compiling a total sales comparison of all selected smart downlights in North America. Please separately explain the US, Canada and Mexico coverage, specific ASINs and the current-round date for Philips Hue, Philips WiZ, Govee, Lumary, HALO and Cync. The Amazon purchase indication is a rough estimate of the number of purchasing customers, not units sold or order count; brand total sales volume and sales revenue are missing and must be clearly stated; do not sum across sites or across ASINs, do not multiply by the number of units in a pack, and do not rank. Output a verifiable plan in combination with the product, real review coverage, and the gap in the responsibilities of the original sourcing person.

DeepSeek / Comprehensive analysis of configured models

Model analysis obtained

Model deepseek-flash; the following is a cited analysis draft that must be manually verified.

Material facts:
The Amazon purchase hint is a rough estimate of the number of recent buyers, not the number of units sold or orders; a parent ASIN may combine child variants, and values cannot be summed across marketplaces or across ASINs, multiplied by the number of units in a pack, or used to calculate sales multiples or brand share. [sales-statistics] [scope]
Of the 8 selected US products, only 2 show a purchase hint: Philips Hue B0B6LP1Q1Z (5/6-inch old-can retrofit · 4-pack) shows 300+ bought in past month, and Govee B0F2165SNY (4-inch canless RGBIC · 4-pack) shows 500+ bought in past month; the other 6 do not show one. [sales-statistics] [sales-us]
None of the 8 selected CA products show a purchase hint. [sales-statistics] [sales-ca]
Of the 8 selected MX products, only 1 shows a purchase hint: Philips Hue B0B6LP1Q1Z shows 50+ comprados el mes pasado; the other 7 do not show one. [sales-statistics] [sales-mx]
Total North America brand sales volume and units sold are both unavailable; only the selected model marketplaces are compared, with 20 original models, related models being only the 4 items of Lumary US/CA/MX and Cync Mexico, and the HALO three marketplaces being already-matched original models. [sales-statistics]
Philips Hue B0B6LP1Q1Z is a 5/6-inch old-can retrofit · 4-pack, manufacturer-stated 1100 lm, Hue App/Bridge ecosystem, wall-control accessory, continuous power and power-loss recovery to be verified. [product-comparison-1]
Philips WiZ B0GT7N35QM is a 5/6-inch old-can retrofit · 4-pack, manufacturer-stated 750 lm, Wi-Fi/WiZ Connected, traditional dimmer compatibility to be verified against the model documentation. [product-comparison-1]
Govee B0F2165SNY is a 4-inch canless RGBIC · 4-pack, manufacturer-stated 900 lm, main light plus zoned backlight, Matter, advanced scene cross-platform support to be verified, switch power-loss recovery and scene retention to be validated. [product-comparison-1]
Govee B0B1V6G21S is a 6-inch canless · 4-pack, product page states 1100 lm, Wi-Fi/Bluetooth, light-on response, network-loss recovery and traditional dimmer to be verified. [product-comparison-1]
Govee B0CJJRRJ7X is a 5/6-inch old-can retrofit · 4-pack, product page states 1000 lm, Wi-Fi/Bluetooth, wall control and continuous power conditions to be verified. [product-comparison-2]

Lumary US-SD6A-4 (white) is a 6-inch canless • 4-pack, 13W, CRI90, 2700–6500K, page title/description 1100lm conflicts with specification table 1000lm, 2.4GHz Wi-Fi/Bluetooth, traditional dimmer instructions unavailable on this white model page. [product-comparison-2]
HALO WiZ Pro HLB6 is the official single-lamp specification for a 6-inch canless (not a 4-pack sales comparison), 900lm, CRI⩾90, 2200–6500K, WiZ/WiZ Pro, usable with a standard switch, dimmer connection prohibited, WiZ Click two favorite modes. [product-comparison-2]
Cync CFIXCNLR6CRVD Reveal is the official single-lamp specification for a 6-inch canless (not a 4-pack sales comparison), 16W, CRI90, 2000–7000K, 1000lm (800lm in Reveal mode), 2.4GHz Wi-Fi/BLE, officially limited to Cync control, general traditional dimmer compatibility not inferred. [product-comparison-2]
The current review research status is pending_browser 22, partial 1, browser_read_interrupted 1; access verification/no body text is not zero reviews, the manual 10-item notes are not the full set, and the current gap does not output a full complaint rate. [review-census]
In the statistics obtained for individual reviews, US/B0C4X96KC3 (Cync) has 8 deduplicated reviews, with 4 reviews rated 1–2 stars, and the low-star rate among the obtained denominator is 50.0%; US/B08LQ6V53R (Lumary) has 8 deduplicated reviews, with 2 reviews rated 1–2 stars, and a low-star rate of 25.0%; US/B0CJJRRJ7X (Govee) has 8 deduplicated reviews, with 1 reviews rated 1–2 stars, and a low-star rate of 12.5%; for the remaining US products, the low-star rate among the obtained denominator is 0.0%; completeness is unverified in all cases.
[review-observed-statistics]

Analytical inference (to be verified):
Within the selected models and sites, the 2 US products with purchase prompts belong to different installation types and sizes (Hue is 5/6-inch old-can retrofit • 4-pack, Govee is 4-inch canless RGBIC • 4-pack), so this cannot be used to compare their sales levels or infer brand share. [sales-statistics] [sales-us]
None of the 8 selected CA items has a purchase prompt, and only 1 MX item has a prompt, indicating that purchase-prompt coverage in this snapshot is sparse and cannot be used to judge that CA or MX market demand is weak. [sales-statistics] [sales-ca] [sales-mx]
Lumary US/MX's B08LQ6V53R overall rating is 3.4 and the low-star rate among the 8 obtained reviews is 25.0%; Cync US's B0C4X96KC3 overall rating is 2.9 and the low-star rate among the 8 obtained reviews is 50.0%, suggesting that these two models may have more experience issues, but sample completeness is unverified and this cannot be treated as a full complaint rate. [rating-overview-2] [review-observed-statistics] [review-census]
Installation and fit are the leading mentioned themes for multiple US products in the obtained individual reviews (Hue 6/8, WiZ 6/8, Govee B0F2165SNY 8/8, Govee B0B1V6G21S 7/8, Govee B0CJJRRJ7X 7/8, Lumary 6/8, HALO 5/8, Cync 4/8), suggesting that installation experience is a cross-brand common concern, but keyword mentions do not equal a negative determination. [review-observed-statistics]
R2 and R4 come respectively from an old Hue model and the Commercial Electric 4-inch model, and both point to rework friction of "discovering only after installation that the code/number must be scanned or entered on the back of the fixture"; similar operational friction appears across sources and is worth verifying, but there is no evidence quantifying its incidence. [reviews-1] [requirements]
The glare feedback for R1 comes only from one historical excerpt, which can only form a hypothesis about "visual comfort when looking directly at a slim profile" and cannot directly claim that competitors fail or that this solution has UGR<19. [reviews-1] [requirements]
R9 and R10 are community self-reports about old Govee models and cannot be mapped to this ASIN or treated as a unified root cause; however, they suggest that wall control, power-on lighting, and network-loss recovery are control-experience dimensions worth verifying. [reviews-2] [requirements]
Signify's Americas supply-chain roles (Chen Wang, Vincent Gelineau) are supply-chain/procurement leads and cannot be treated as the persons responsible for consumer smart downlights; Govee's Overseas Sales/GTM roles have not been confirmed as responsible for North America smart downlights. [people-1] [people-2]
The user materials mention that "a person whose job title says The Marshall Group conflicts with the Govee

screening," but no entry for that person appears in the given evidence, so it is impossible to judge their relationship with Govee on that basis, nor to infer that they have left. [people-2] [scope]

Action recommendations:
According to the user's focus, output a purchase-prompt comparison table using "selected model × site × installation type × size × packaging" as the minimum comparison unit, annotating each row with ASIN, site, current-round date (2026-10-26) and "not displayed," and explicitly stating no summing, no multiplying by unit count, no ranking, and no representation of total brand sales or share. [user-focus] [sales-statistics] [sales-us] [sales-ca] [sales-mx]
Fill the gap in total brand sales and revenue: clearly state that these are currently unavailable, and do not sum across sites or ASINs; if brand-level data is needed, obtain verifiable sources separately before comparing. [sales-statistics] [scope]
For Lumary US/MX B08LQ6V53R and Cync US B0C4X96KC3, prioritize completing full review collection (currently pending_browser), verify low-star themes and completeness, and then decide whether to output a complaint rate. [review-census] [review-observed-statistics]
For installation and pairing friction, validate a solution that "saves device identity before installation": use verifiable numbers on the lamp body, junction box, and packaging pairing card, scan and register first and then locate and group each light, and clearly indicate any missed devices; have a first-time user complete the installation registration of multiple lights in one room, recording pairing time, rework count, and failure reasons. [requirements] [reviews-1]
For direct-view comfort, compare two structures—thin diffuser versus deep-baffle shielding—under living-room seated and bedside lying postures, comparing direct-view luminous-surface experience, light intensity distribution, low-brightness dimming and flicker; do not promise UGR<19 or one model suitable for all ceilings. [requirements] [reviews-1]
For control stability, select a validated control architecture according to the customer ecosystem, separately test disconnection of the external network, disconnection of the local network, power cut and recovery, record power-on lighting time and App/voice activation time, and check single-lamp, group and scene capabilities item by item; do not map community feedback on old Govee models to this ASIN. [requirements] [reviews-2]
For installation compatibility assessment, design a Retrofit conversion version and a Canless no-can version separately, provide dimension drawings, cutout templates, accessory lists and old-hole cover options, and confirm the compatibility table only after trial installation with actual old cans, hole diameters and ceiling samples. [requirements] [proposal]
Product plan (Comfort Connect 6 provisional name) serves only as a discussion target: 6-inch Canless preferred, with a separate Retrofit SKU; white light provisionally targeted for discussion at 900–1200 lm, CRI⩾90, 2700–6500K, with digital dimming provisionally planned for validation at 1%–100%; no sample lamps, measurements, certifications or cost validation yet. [proposal]
Role and responsibility gaps: neither the Signify Americas supply chain role nor the Govee Overseas Sales/GTM role has been confirmed to be responsible for consumer smart downlights; the actual North America smart downlight product/procurement owner must be verified through interviews or dated résumés; the Americas supply chain role must not be treated as the consumer smart downlight owner, and the person with the The Marshall Group title must not be taken as Govee's current owner or presumed to have left. [people-1] [people-2] [scope]
Suggested next-step customer interview questions: ① target markets in the US/Canada/Mexico and installation conditions (old-can retrofit vs new cutout, hole diameter, ceiling depth); ② required platform and wall-control method, expectations for recovery after network loss; ③ priority of white light/color light and low-brightness comfort requirements; ④ kit and price targets; ⑤ acceptable time consumption and rework tolerance in the installation pairing process; ⑥ specific views on the low-star experience of competitors Lumary and Cync. [proposal] [requirements] [review-observed-statistics]

People research • LumiPilot original sourcing task

Signify • Philips Lighting

Original task 57aadfc44f5c45b3 • partially completed • Locations US/CA/MX

Source: https://www.linkedin.com/in/shuyu-jade-jing-65bb3123b/

To be verified: the profile was opened, but no work experience with dates was identified; only the company screening clue is retained.

Karen Lv

Govee Moments Trading Limited - Overseas Sales Manager

Personal location: Shenzhen, Guangdong, China

Read coverage: own profile; employment lead: current filter/resume lead

Original company affiliation text: Current: Senior Overseas sales Manager at Govee

Source: https://www.linkedin.com/in/karen-lv-7a593815a/

To be verified: the profile was opened, but no work experience with dates was identified; only the company screening clue is retained.

Coverage gap: this profile still did not provide identifiable information within the 60-second wait budget.

Being located in North America does not prove responsibility for North America; "Americas" in a job title does not prove responsibility for consumer smart downlights. A search-filter match does not replace dated employment experience or personal confirmation.

Product and Amazon sales leads · Public observations with clear dates

Sales statistics and comparison within the same group

Amazon Sales trend is a rough estimate of the number of customers who purchased recently, not the number of units sold or orders; a parent ASIN may also combine child variants. It only covers the selected products and the prompts shown, and does not represent precise sales, total brand volume or share; do not add them together, do not multiply by the number of units in a pack, and do not calculate sales multiples.

US

Observed 8 entries; 2 entries with purchase prompts; precise monthly sales, sales revenue and share are all unavailable.

5/6-inch old-can retrofit · 4-pack

Philips Hue / B0B6LP1Q1Z / 300+ bought in past month; Philips WiZ / B0GT7N35QM / not shown, cannot be ranked; Govee / B0CJJRRJ7X / not shown, cannot be ranked

Only prompt thresholds can be compared; actual sales levels cannot be compared; entries not shown are not ranked.

4-inch canless RGBIC · 4-pack

Govee / B0F2165SNY / 500+ bought in past month

Only prompt thresholds can be compared; actual sales levels cannot be compared; entries not shown are not ranked.

6-inch canless · 4-pack

Govee / B0B1V6G21S / not shown, cannot be ranked; Lumary / B08LQ6V53R / not shown, cannot be ranked

Only prompt thresholds can be compared; actual sales levels cannot be compared; entries not shown are not ranked.

6-inch canless · 1-pack

HALO / WiZ Pro / B0C1F1XLWS / not shown, cannot be ranked

Only prompt thresholds can be compared; actual sales levels cannot be compared; entries not shown are not ranked.

6-inch canless · 3-pack

Cync / B0C4X96KC3 / not shown, cannot be ranked

Only prompt thresholds can be compared; actual sales levels cannot be compared; entries not shown are not ranked.

CA

User experience and reviews · manually selected verbatim excerpts

[R1] Hue · light comfort

Brian McBarron / 2022-10-07 / 579573 · older slim light

Approves of the installation and brightness, but finds direct viewing harsh and hopes for increased shielding depth.

Historical subjective experience; cannot be converted into UGR or measured glare metrics.; Source ID S2

[R2] Hue · installation pairing

Pacco / 2022-10-01 / 579573 · older slim light

Works well after pairing; only after installation did they discover the serial number must be entered manually, adding rework.

The detail that the number is located on the back of the junction box is supplemented by the same text on the official website; recorded only as one piece of feedback.; Source ID S2

[R3] Hue · should be retained

Aniruddha J / 2022-10-08 / 579573 · older slim light

Likes the slim canless design and the connection experience with the bridge and remote control.

Reposted from PhilipsHue; deduplicated against the same text on the official website.; Source ID S2

[R4] Commercial Electric · installation pairing

Simple easy setup / 2026-05-06 / 4-inch model · merged page, full SKU not seen

Installation and network setup are convenient, but pairing requires scanning the QR code on the back of the light, which is awkward to operate.

Search snippet; do not attribute this 4-inch review to the 5/6-inch SKU on the main page.; Source ID S4

[R5] Commercial Electric · home control

Tom B / 2026-06-24 / Hubspace merged page · specific variant not seen

App-adjustable color and dimming; dimming and light-ring control in Alexa groups did not meet expectations.

The scenario limitation encountered by the user does not mean that the brand does not support Alexa dimming at all.; Source ID S4

[R6] Commercial Electric · should be retained

Devw / 2026-10-15 / Hubspace merged page · specific variant not seen

Easy to connect to the App, and likes the color-changing feature.

The retrieved snippet is marked Reviewer Program; not used as independent sales evidence.; Source ID S4

[R7] HALO · Installation fit

HomeDepotCustomer / 2026-04-15 / HLB WiZ merged page · specific variant not seen

Acknowledges the electrical installation and App control; the trim ring improves the appearance of the old cutout.

The retrieved snippet is marked Reviewer Program; it cannot be concluded that every old cutout will fit.; Source ID S5

[R8] HALO · Network conditions

Home Depot user (name not shown in snippet) / 2026-01-29 / HLB WiZ merged page · specific variant not seen

Likes the slim design and installation experience, and emphasizes that App performance depends on good Wi-Fi.

A conditional positive experience; not a verified disconnection fault.; Source ID S5

[R9] Govee · Network and power supply

Frankthetanm / historical post · absolute date unavailable / self-reported H601D · not mapped to this ASIN

The original post reported disconnection; the author later stated that after replacing with an ordinary switch and reconnecting, it tended to become stable.

A Reddit user's self-account, not a verified Amazon purchase review; the follow-up handling is retained, and the root cause of the fault or a defect in the current model cannot be determined.; Source ID G1

[R10] Govee · light-on response

covingtonFF / historical post · absolute date unavailable / self-reported H601B · not mapped to this ASIN

The user stated that after the wall switch is powered on, the light turns on relatively slowly; later stated that when continuously powered, voice activation is relatively fast.

A forum experience lead, not measured performance; replies in the same thread contain differing experiences, and this should not be generalized as a problem across the entire Govee product line.; Source ID G2

From pain points to verifiable product requirements

RQ1 · After installation on the ceiling, it should not be necessary to take it down again for pairing

Evidence: R2 / R4

Requirement: The installation and pairing processes must connect seamlessly, and the device identity can be saved before installation.

Design suggestion: Use verifiable numbers on the lamp body, junction box, and packaging pairing card; scan the code to register first, then locate and group each lamp one by one; clearly indicate any missed devices.

Validation: Have a first-time user complete the multi-lamp installation registration for one room; record pairing time, number of reworks, and reasons for failure.

Boundary: Similar operational friction appears across sources and is worth verifying; there is no evidence quantifying its occurrence rate.

RQ2 · Slim installation also needs to take visual comfort into account

Evidence: R1 / R3

Requirement: Both the seated posture in the living room and the lying posture beside the bed must be checked for the experience of looking directly at the light-emitting surface.

Design suggestion: Compare two structures—thin soft-diffusion and deep-cup shielding; retain the color-scene advantage and provide warm-white reading and a low-brightness night entry.

Verification: In the same room, compare seated and lying observation, light intensity distribution, low-brightness dimming and flicker; determine the evaluation method according to the installation environment.

Boundary: One historical glare feedback forms a hypothesis; it cannot directly claim that competitors fail or that this solution has UGR<19.

RQ3 · Family members need a stable, understandable way to turn on the light

Evidence: R5 / R8 / R9 / R10

Requirement: The capability boundaries of wall control, App and voice platforms should be consistently visible.

Design suggestion: Select a verified control architecture according to the customer ecosystem; design commonly used wall control, network-loss prompts and recovery strategies; list single-light/group capabilities platform by platform.

Verification: Separately test external network disconnection, local network disconnection, power cut and recovery; record power-on lighting time and App/voice activation time; check single lights, groups and scenes item by item.

Boundary: The Govee community feedback is a self-report about an old model and cannot be mapped to this ASIN or used to identify a unified root cause; Hue already has a wall control module (S7).

RQ4 · Before purchase, one can judge whether it can be installed

Evidence: R3 / R7

Requirement: Distinguish old-can retrofit from new cutout, and clearly explain hole diameter, ceiling depth and accessories.

Design suggestion: Design a Retrofit model and a Canless model separately; provide dimension drawings, cutout templates, accessory lists and old-hole cover options.

Verification: Trial-install with actual old cans, hole diameters and ceiling samples; record installation space and accessory conditions, then confirm the compatibility table.

Boundary: A product opportunity derived from positive experience; it is not a confirmed compatibility fault, nor does it promise one model fits all ceilings.

Product Solution Draft · Comfort Connect 6 (working name)

Installs smoothly, connects reliably, looks comfortable, and family members can use it. Design the hardware, control, and installation process together.

Installation and Structure

Prioritize 6-inch Canless versions; also set up a Retrofit SKU. Compare deep-cup shielding with slim soft light; do not promise one model fits all ceilings.

White Light and Color Light

For white light, tentatively use 900–1200 lm, CRI⩾90, and 2700–6500 K as discussion targets; measure color light brightness independently. Use 1%–100% as the proposed verification target for digital dimming.

Installation Pairing and Control

The pairing card and device number must match; register before installation, and support per-light locating and omission prompts. Select the control route according to the customer ecosystem, and verify power-on, network-disconnection recovery, and voice grouping state by state.

Feature Trade-offs

Retain color light ambiance; RGBIC backlight can be evaluated as an independent option. First verify white light comfort, low-brightness stability, and turn-on response, then decide features and cost.

The above are design directions or proposed targets; there are still no own-side sample lamps, measurements, certifications, or cost verification; sales leads do not prove a market gap, purchase intent, or our deliverability.

First Confirm with the Customer

Target markets in the US / Canada / Mexico, installation conditions, required platforms, wall control, white light/color light priority, kits, and price targets.

Then Move to Samples and Quotation

Measure optical, dimming, flicker, and thermal performance; check market-specific access requirements. List materials, control modules, processes, certification amortization, molds, and freight separately.

Original Sources and Citation Index

[S1] Philips Hue US official website · Slim Downlight 6 inch

https://www.philips-hue.com/en-us/p/hue-white-and-color-ambiance-slim-downlight-5-6-inch/046677579579

Legacy UPC 046677579579; slim canless, Bluetooth / Hue Bridge; 1200 lm @4000K, 120 V.

The page shows Item no longer available; treated as a historical design reference. Some reviews on the official website show an import time of 2026-08-18, which differs from the 2022 date on the identical text on Lowe's; not treated as new reviews. The dimension/weight fields contain questionable points and were not used in the plan.

[S2] Lowe's · Hue 579573 user reviews

https://www.lowes.com/reviews/philips-hue-579573-recessed-lighting/5016044163?offset=40

R1–R3: glare, pairing numbering, slim installation and control experience.

Three reviews are marked From PhilipsHue, are reposts, and must not be double-counted with the official website; the date is 2022. The platform AI summary was not used.

[S3] Cooper Lighting · US MarketPro product catalog

https://www.cooperlighting.com/content/dam/cooper-lighting/resources/programs/marketpro/pdfs/Cooper-Lighting-Solutions-MarketPro-Catalog.pdf

HALO HLB6099WZRGBWMWR: 6 inch, 120 V, 960 lm, 12 W, WiZ; tunable white and color.

The catalog is a product declaration; no sample lamp measurements were performed; Matter must be re-verified by specific SKU, batch and firmware.

[S4] Home Depot · Commercial Electric Hubspace reviews

https://www.homedepot.com/p/reviews/Commercial-Electric-5-in-6-in-Smart-Integrated-LED-Recessed-Light-Trim-Wireless-Adjustable-CCT-New-Construction-Remodel-Powered-by-Hubspace-538561010/314254248/1

R4–R6: QR code location, Alexa grouping expectations, color change and connection experience; the page's main model is 538561010.

Combined reviews for 4 inch, 5/6 inch and the kit; R4 explicitly comes from the 4 inch model. Not fully captured; star-rating averages or recommendation rates were not used.

[S5] Home Depot · HALO HLB WiZ reviews

https://www.homedepot.com/p/reviews/HALO-HLB-6-in-Adjustable-Color-Dimmable-and-Tunable-White-Slim-Canless-Smart-Wi-Fi-LED-Recessed-Downlight-with-WiZ-Pro-HLB6099WZRGBWMWR/324821240/1

R7–R8: installation, decorative trim ring and Wi-Fi signal conditions.

The page includes different sizes; the selected excerpts do not show the full SKU item by item. R7 is marked Reviewer Program; the incentive bias must be retained.

[S6] Cooper Lighting · Canada MarketPro downlight catalog

https://www.cooperlighting.com/content/dam/cooper-lighting/resources/programs/marketpro/canada/pdfs/marketpro-canada-downlights.pdf

Canada HLB6099WZRGBWMWR-C: 120 V, 974 lm, 11.2 W.

Different from the US model without -C; only supplements Canadian specifications and does not represent Canadian consumer reviews or overall North American demand.

[G1] Govee user self-report · H601D disconnection and subsequent handling

https://www.reddit.com/r/Govee/comments/1be9t5k/recessed_h601d_constant_disconnecting/

R9: verification clues for connectivity issues and power/switch compatibility.

Self-reported model, cannot be mapped to this ASIN; the author later stated it stabilized after replacing with an ordinary switch, cause not independently verified.

[G2] Govee user self-report · H601B power-on response

https://www.reddit.com/r/Govee/comments/187s9br/installed_first_govee_recessed_light_h601b_always/

R10: the smart turn-on experience differs between powering on via the wall switch and maintaining power supply.

Historical user self-report, not a manufacturer measurement; different reply experiences vary, and the absolute posting date is unavailable this time.

[S7] Lumary US-SD6A-4 official product page

https://www.lumarysmart.com/collections/living-room-bedroom/products/lumary-smart-canless-recessed-lighting-6inch-4pcs

13W, CRI90, 2700–6500K, 2.4GHz Wi-Fi and grouping; official website 4 only lists a price of $139.99. Luminous flux title 1100lm/spec 1000lm inconsistent.

Official website price is not Amazon; its review count was not used as sales volume, and the luminous flux conflict remains pending verification.

[S8] HALO HLB6 Smart Wi-Fi official specification sheet (2023-02-16)

https://www.cooperlighting.com/api/assets/v1/file/CLS/content/a7a6e72819544c22a860afb9017c377f/HALO-HLB-6-spec-sheet.pdf

900lm, CRI90, 2200–6500K; WiZ Pro installation delivery; ordinary switch, WiZ Click, dimmers prohibited.

Old official specifications used as technical reference; on-sale status, current certifications and Amazon sales volume are unavailable, and later-generation Matter features are not applied.

[S9] Cync Reveal Wafer official specification sheet

https://www.gelighting.com/sites/default/files/products/u6gqffimfmevhvvi7xnc.pdf

CFIXCNLR6CRVD, 6 inches 16W, CRI90, 2000–7000K, 1000lm and Reveal800lm; Wi-Fi/BLE and specified controls.

This model is not equivalent to the Matter product with the MS suffix; current Amazon on-sale status and purchase volume are unverified.

[S10] Cync official Matter model list

https://cyncsupport.gelighting.com/s/article/Cync-Products-with-Matter-Compatibility

The 6-inch Reveal Matter list is CFIXCNLR6CRVDMS, indicating that verification must be based on the complete suffix.

For model identity verification only; do not transfer the functions of the listed models to CRVD, and do not use it as a basis for sales volume.

[METRIC1] Amazon official Sales trend FAQ: purchase trend definition

https://sellercentral.amazon.co.uk/help/hub/reference/external/G2CRYWPU52D7TGAK?locale=en-GB

The indicator is a rough estimate of the number of customers who purchased recently, not the number of units sold or orders; the parent ASIN may combine child variants.

This FAQ page is marked for the UK site; the official US announcement likewise describes it as an estimate of the number of customers. This definition does not provide sales data for this case, and the indicators cannot be summed to obtain total brand downlight sales.

[user-focus] Customer concerns provided by the user (unverified input)

Customer showcase case: prioritize compiling a total sales comparison of all selected smart downlights in North America. Please separately explain the US, Canada and Mexico coverage, specific ASINs and the current-round date for Philips Hue, Philips WiZ, Govee, Lumary, HALO and Cync. The Amazon purchase indication is a rough estimate of the number of purchasing customers, not units sold or order count; brand total sales volume and sales revenue are missing and must be clearly stated; do not sum across sites or across ASINs, do not multiply by the number of units in a pack, and do not rank. Output a verifiable plan in combination with the product, real review coverage, and the gap in the responsibilities of the original sourcing person.

[scope] Research scope and evidence boundaries

The persons come from the previously saved sourcing task; product sales and reviews are a dated snapshot of publicly available case materials. Generating the report does not re-crawl the sources. Purchase indicators are open thresholds and do not represent exact sales, actual ranking, multiples or brand share. The person's location does not prove which market they are responsible for. Different local models are listed separately, cannot be treated as the original model, and their parameters are not automatically transferred to the original model.

[sales-statistics] Product purchase volume indicator coverage statistics

Amazon Sales trend is a rough estimate of the number of customers who purchased recently, not the number of units sold or orders; the parent ASIN may also combine child variants. Only the selected products and indicator coverage are counted; this does not represent exact sales, brand totals or share, and the figures are not added together, not multiplied by the number of units per pack, and not used to calculate sales multiples.
Total North America brand sales and units sold are both unavailable; only the selected model sites are compared. There are 20 original models; related models are only Lumary US/CA/MX and Cync Mexico, 4 items; the three HALO sites are matched original models. Rankings cannot be compared across installation types, sizes and packaging.

US/B0C4X96KC3: deduplicated 8, body text 8, known star rating 8, 1–2 stars 4, low-star rate with obtained denominator 50.0%; the first two topics mention installation and fit 4, App and ecosystem 4; completeness unverified

[requirements] derivation from pain points to requirements, to be verified

After installation on the ceiling, there should be no need to disassemble again for pairing; evidence R2,R4; requirement: the installation and pairing processes must connect, and device identity can be saved before installation.; recommendation: use verifiable numbers on the lamp body, junction box and packaging pairing card; scan to register first, then locate and group each lamp one by one; clearly indicate missing devices.; validation: have a first-time user complete multi-lamp installation registration for one room; record pairing time, rework count and failure reasons.; similar operational friction appears across sources and is worth verifying; there is no evidence quantifying its incidence rate.

Slim installation also needs to take visual comfort into account; evidence R1,R3; requirement: check the experience of looking directly at the light-emitting surface both when sitting in the living room and when lying beside the bed.; recommendation: compare the two structures of slim soft light and deep-cup shielding; retain the color scene advantage and provide warm white reading and low-brightness entry at night.; validation: compare sitting and lying observation, light intensity distribution, low-brightness dimming and flicker in the same room; determine the evaluation method according to the installation environment.; one historical glare feedback forms a hypothesis; it cannot directly claim that competitors fail or that this solution has UGR<19.

Family members need a stable and understandable way to turn on the lights; evidence R5,R8,R9,R10; requirement: the capability boundaries of wall control, App and voice platforms should be consistently visible.; recommendation: select a verified control architecture according to the customer ecosystem; design commonly used wall control, network-loss prompts and recovery strategies; list single-lamp/group capabilities platform by platform.; validation: separately test external network disconnection, local network disconnection, power cut and recovery; record power-on lighting time and App/voice turn-on time; check single lamp, grouping and scenes item by item.; Govee community feedback is a self-report about an old model and cannot be mapped to this ASIN or used to identify a unified root cause; Hue already has a wall control module (S7).

Before purchase, one can judge whether it can be installed; evidence R3,R7; requirement: distinguish old-can retrofit from new cutout, and clearly explain hole diameter, ceiling depth and accessories.; recommendation: design Retrofit and Canless versions separately; provide dimension drawings, cutout templates, accessory lists and old-hole cover options.; validation: trial-install with actual old cans, hole diameters and ceiling samples; record installation space and accessory conditions, then confirm the compatibility table.; a product opportunity from positive experience; it is not a proven compatibility failure, nor a promise that one model fits all ceilings.

[proposal] solution discussion goals, not yet tested

Job or product title: Comfort Connect 6 (working name); solution proposition: installs smoothly, connects reliably, looks comfortable, and family members can use it. Design hardware, control and installation process together.; solution content: job or product title: installation and structure; description: prioritize the 6-inch Canless version; set up a separate Retrofit SKU. Compare deep-cup shielding and slim soft light, and do not promise one model fits all ceilings.
Job or product title: white light and color light; description: white light is currently discussed with targets of 900–1200 lm, CRI⩾90, 2700–6500 K; color light brightness is measured independently. Digital dimming uses 1%–100% as the proposed validation target.
Job or product title: installation pairing and control; description: the pairing card and device numbers are consistent, register before installation, and support per-lamp location and missing-item prompts. The control route is selected according to the customer ecosystem, and power-on, network-loss recovery and voice grouping are verified state by state.
Job or product title: feature trade-offs; description: retain color light ambience; RGBIC backlight can be evaluated as an independent option. First verify white light comfort, low-brightness stability and turn-on response, then decide features and cost.; capability boundary: the above are design directions or proposed targets, and there is no verification of our own sample lamps, measurements, certifications or costs; sales leads do not prove a market gap, purchase intent or our deliverability.; customer confirmation items: target markets of the US / Canada / Mexico, installation conditions, required platforms, wall control, white/color light priority, package and price targets.; sample and quotation validation: measure optics, dimming, flicker and thermal performance; check market access by market. List materials, control modules, processes, certification amortization, molds and freight separately.

[reviews-1] Manual historical experience notes, not a full review statistics set

R1 / Hue / 2022-10-07 / 579573 • Old thin light: installation and brightness are appreciated, but direct viewing feels glaring; users hope for greater shielding depth.; Historical subjective experience; cannot be converted into UGR or measured glare metrics.; Source S2
R2 / Hue / 2022-10-01 / 579573 • Old thin light: works well after pairing; only after installation did the user discover that the serial number must be entered manually, causing rework.; The detail that the number is located on the back of the junction box is supplemented by the same text on the official website; recorded as only one piece of feedback.; Source S2
R3 / Hue / 2022-10-08 / 579573 • Old thin light: likes the thin canless design and the experience of connecting to the bridge and remote control.; Reposted from PhilipsHue; deduplicated against the same text on the official website.; Source S2
R4 / Commercial Electric / 2026-05-06 / 4-inch model • merged page, full SKU not seen: installation and network setup are convenient, but pairing requires scanning the QR code on the back of the light, which is awkward.; Search snippet; this 4-inch review is not attributed to the 5/6-inch SKU on the main page.; Source S4
R5 / Commercial Electric / 2026-06-24 / Hubspace merged page • specific variant not seen: the App can adjust color temperature and dimming; dimming and light-ring control in an Alexa group did not meet expectations.; A scenario limitation encountered by a user does not mean the brand as a whole does not support Alexa dimming.; Source S4

[reviews-2] Manual historical experience notes, not a full review statistics set

R6 / Commercial Electric / 2026-10-15 / Hubspace merged page • specific variant not seen: easy to connect to the App, and the color-changing feature is appreciated.; The search snippet is marked Reviewer Program; not treated as independent sales evidence.; Source S4
R7 / HALO / 2026-04-15 / HLB WiZ merged page • specific variant not seen: electrical installation and App control are appreciated; the trim ring improves the appearance of an old cutout.; The search snippet is marked Reviewer Program; it cannot be concluded that every old cutout can be fitted.; Source S5
R8 / HALO / 2026-01-29 / HLB WiZ merged page • specific variant not seen: likes the thin design and installation experience, and emphasizes that App performance depends on good Wi-Fi.; A conditional positive experience; not a verified disconnection fault.; Source S5
R9 / Govee / historical post • absolute date unavailable / self-reported H601D • not mapped to this ASIN: the original post reported disconnections; the author later said that after replacing the ordinary switch and reconnecting, it tended to stabilize.; A Reddit user's own account, not a verified Amazon purchase review; the follow-up handling is retained, but the root cause of the fault or a defect in the current model cannot be determined.; Source G1
R10 / Govee / historical post • absolute date unavailable / self-reported H601B • not mapped to this ASIN: the user states that the wall switch lights up slowly after power-on; later states that voice activation is faster when power is continuously supplied.; forum experience lead, not measured performance; replies in the same thread contain differing experiences, not to be generalized as a Govee-wide issue.; source G2

Supplementary conversation after the report

No question has been asked yet. You can enter customer pain points or other keywords on the original LumiPilot report page to continue the analysis.
